GitHub: <https://github.com/souviknath18>

## PROFESSIONAL SUMMARY

Full Stack Engineer with hands-on experience developing scalable web applications using Next.js, React.js, JavaScript, TypeScript, Django, and Django REST Framework. Strong expertise in backend development, RESTful APIs, JWT Authentication, role-based access control, API security, and relational databases MySQL, PostgreSQL. Skilled in Git, GitHub, Postman, system design fundamentals, and clean architecture.

## TECHNICAL SKILLS

- Next.js
- FastAPI
- Django REST Framework
- RBAC
- Github Actions
- AI-powered applications
- React.js
- HTML/CSS
- RESTful APIs
- MySQL
- System Design
- LLM
- JavaScript
- Python
- JWT Authentication
- PostgreSQL
- CI/CD Basics
- RAG
- TypeScript
- Django
- API Security
- Git
- Docker
- Vercel Deployment

## AI & EMERGING TECHNOLOGIES

- Exploring LLM-powered application development using OpenAI APIs and Retrieval-Augmented Generation architectures
- Learning AI agent workflows, vector databases, prompt engineering, and enterprise AI integrations
- Building AI-assisted full stack applications using React, Next.js, and Python backend services

## PROFESSIONAL EXPERIENCE

**GTPL — Software Engineer**  
Bangalore, Karnataka, India

**01/2024 — Present**

- Developed and maintained scalable frontend modules using Next.js and React.js, improving dashboard responsiveness and reducing page load times by ~30%.
- Built and optimized RESTful APIs using Django REST Framework, improving backend workflow efficiency and reducing average API response time by ~25% across compliance modules.
- Implemented JWT authentication and RBAC systems for three user roles, fortifying application security and access management, and processing 75,000+ authentication requests daily with zero downtime.
- Integrated React/Next.js frontend systems with PostgreSQL and MySQL databases, improving data retrieval performance and increasing API response consistency by ~30%.
- Collaborated with cross-functional teams in agile sprint cycles, helping deliver production-ready features ~20% faster while reducing recurring bug issues.
- Designed scalable backend workflows for audit trails and compliance reporting, reducing repetitive manual processes by ~40% and improving maintainability.

## PROJECTS

### AI Expense Insight Platform (Personal Project)

- Building an AI-powered expense tracking platform using Next.js, TypeScript, Django REST Framework, and MySQL
- Developing secure JWT-based authentication and role-based access systems for personalized financial dashboards
- Designing RESTful APIs and scalable backend architecture for expense categorization and analytics workflows
- Exploring LLM-powered financial insights and AI-assisted recommendation workflows using OpenAI APIs and RAG concepts

## EDUCATION

**Bachelor of Technology —** Electronics and Communication Engineering, 09/2021  
Assam University Silchar, Assam

## LANGUAGES

- English
- Hindi
- Bengali
