

SOUVIK NATH

Software Engineer | Django | Python | React | Next.js | JavaScript | TypeScript | Microservices

Bangalore, India | +91-8638937703 | souviknath18@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3 years of experience building scalable FinTech and core banking applications using JavaScript, TypeScript, React.js, Next.js, Python, Django REST Framework, and FastAPI. Strong experience designing RESTful APIs, microservices, financial transaction workflows, asynchronous processing systems, and database-driven applications using PostgreSQL, MySQL, CockroachDB, Redis, Kafka, and Celery. Experienced in API security, caching, database optimization, production debugging, Docker, CI/CD pipelines, GCP, and AWS. Contributed to production-grade financial platforms covering lending, transaction processing, account management, expense tracking, financial analytics, and AI-powered financial automation.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Backend: Django, Django REST Framework (DRF), FastAPI, RESTful APIs, Microservices, Async Programming, Celery, Redis, WebSockets

Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui, React Query, Zustand

Databases: PostgreSQL, MySQL, MongoDB, CockroachDB, pgvector, ChromaDB, Schema Design, Data Modeling, Query Optimization, Indexing

Architecture: Microservices Architecture, Apache Kafka, Event-Driven Architecture, Distributed Systems, Caching, Third-Party API Integrations

AI & LLM: OpenAI API, Large Language Models (LLMs), RAG, Prompt Engineering, Embeddings, Vector Search, Semantic Search, AI Workflows

Cloud & DevOps: Docker, Docker Compose, GitHub Actions, CI/CD Pipelines, Linux, Git, GitHub, Google Cloud Platform (GCP), AWS EC2, AWS S3

Testing: Jest, Pytest, API Testing, Postman

Security: JWT Authentication, Role-Based Access Control (RBAC), OAuth 2.0, API Security, Authentication & Authorization

Engineering: System Design, Performance Optimization, Debugging, Root Cause Analysis, Production Support, Code Review, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer – Full Stack | Gowdanar Technosoft Pvt Ltd, Bangalore

Sep 2023 - Present

- Designed and developed scalable RESTful APIs and backend services using Django REST Framework and FastAPI for FinTech and core banking platforms.
- Contributed to 40+ production-grade APIs for authentication, onboarding, account management, lending, and transaction processing.
- Built modular backend services using Python and microservices architecture, following clean architecture and reusable coding practices.
- Optimized PostgreSQL and CockroachDB schemas, queries, and indexes for high-volume financial workloads.
- Developed asynchronous and event-driven workflows using Apache Kafka, Celery, Redis, and WebSockets.
- Implemented secure APIs with JWT, RBAC, validation, authentication, and authorization controls.
- Used Redis for caching and wrote unit and API tests using Pytest and Postman.
- Containerized services with Docker, supported GitHub Actions CI/CD, and worked with GCP and AWS EC2/S3.
- Resolved production issues through debugging and root-cause analysis while collaborating with product, frontend, QA, and DevOps teams.
- Participated in code reviews, API design, Agile development, testing, and production releases.

KEY PROJECTS

MvLEND - Composable Core Banking & Lending Platform

Tech Stack: Django, Django REST Framework, FastAPI, Apache Kafka, CockroachDB, Next.js, TypeScript, GCP

- Contributed to a production-grade core banking and digital lending platform supporting borrower onboarding, loan processing, repayments, and fund disbursement.
- Built REST APIs using Django REST Framework and FastAPI for loan origination, repayment processing, and account management.
- Worked with Kafka-based event-driven architecture for asynchronous transaction processing and service decoupling.
- Helped design and optimize CockroachDB schemas and queries for accounts and financial transactions.
- Developed operational dashboards using Next.js and Tailwind CSS for monitoring, reporting, and account management.

Aura Finance – AI-Powered Personal Finance Assistant

Tech Stack: Next.js, TypeScript, Django REST Framework, PostgreSQL, OpenAI API, Celery, Redis, pgvector, JWT, Docker

- Built a full-stack personal finance platform for transactions, accounts, budgets, goals, subscriptions, reports, and financial analytics.
- Developed multi-source transaction ingestion supporting financial document uploads, account synchronization, and transaction management.
- Built AI-powered PDF, CSV, and image transaction extraction using OpenAI, Celery, Redis, and rule-based processing.
- Implemented RAG, embeddings, pgvector, semantic search, AI categorization, and personalized financial insights.
- Developed REST APIs and dashboards for financial transactions, accounts, budgeting, reporting, and analytics.
